## Metamorphosis: Creative Imagination in Fine Arts Between Life-Projects and Human Aesthetic Aspirations: 81 (Analecta Husserliana)

How do we endure when we and everything around us are caught up in incessant change? But the course of this change does not seem to be haphazard and we may seek the modalities of its Logos in the transformations in

which it occurs. The classic term "Metamorphosis" focuses upon the proportions between the transformed and the retained, the principles of sameness and otherness. Applied to life and its becoming, metamorphosis pinpoints the

proportions between the vital and the aesthetic significance of life. Where could this metaphysical in-between territory come better to light than in the Fine Arts? In this collection are investigated the various proportions between the vital significance of the constructivism of life and a specifically human contribution made by the creative imagination to the transformatory search for beauty and aesthetic values.
