Colour-Blindness: With a Comparison of Different Methods of Testing Colour-Blindness (Psychology Revivals) Mary Collins

Originally published in 1925, this book embodies the results of research on red-green colour-blind subjects, supplemented by brief accounts of blue-yellow, total, and acquired colour-blindness to complete the description of the different forms of the defect. After a historical survey of previous work by such men as Dalton, Helmholtz, Rayleigh, Edridge-Green and others, the author deals with the most important theories of colour-blindness, and with a description of the tests and a discussion of their results.

Mattie Martin:

As a scholar exactly feel bored in order to reading. If their teacher expected them to go to the library in order to make summary for some publication, they are complained. Just little students that has reading's heart or real their hobby. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that looking at is not important, boring and also can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Colour-Blindness: With a Comparison of Different Methods of Testing Colour-Blindness (Psychology Revivals) can make you experience more interested to read.
