Computer Vision in Robotics and Industrial Applications (Series in Computer Vision)

Computer Vision in Robotics and Industrial Applications (Series in Computer Vision)

The book presents a collection of practical applications of image processing and analysis. Different vision systems are more often used among others in the automotive industry, pharmacy, military and police equipment, automated production and measurement systems. In each of these fields of technology, digital image processing and analysis module is a critical part of the process of building this type of system.

The majority of books in the market deal with theoretical issues. However, this unique publication specially highlights industrial applications, especially industrial measurement applications. Along with its wide spectrum of image processing and analysis applications, this book is an interesting reference for both students and professionals.

Readership: Researchers, professionals and academics in image analysis, machine perception/computer vision, software engineering and fuzzy logic.

From reader reviews:

Jason Hill:

The book untitled Computer Vision in Robotics and Industrial Applications (Series in Computer Vision) is the e-book that recommended to you to learn. You can see the quality of the e-book content that will be shown to a person. The language that writer use to explained their ideas are easily to understand. The writer was did a lot of research when write the book, therefore the information that they share to you personally is absolutely accurate. You also can get the e-book of Computer Vision in Robotics and Industrial Applications (Series in Computer Vision) from the publisher to make you much more enjoy free time.

Della Bailey:

Are you kind of active person, only have 10 or maybe 15 minute in your day to upgrading your mind skill or thinking skill even analytical thinking? Then you have problem with the book in comparison with can satisfy your short space of time to read it because all of this time you only find guide that need more time to be read. Computer Vision in Robotics and Industrial Applications (Series in Computer Vision) can be your answer mainly because it can be read by you who have those short extra time problems.

Allen Goehring:

Beside this specific Computer Vision in Robotics and Industrial Applications (Series in Computer Vision) in your phone, it can give you a way to get closer to the new knowledge or details. The information and the knowledge you may got here is fresh through the oven so don't possibly be worry if you feel like an old people live in narrow village. It is good thing to have Computer Vision in Robotics and Industrial Applications (Series in Computer Vision) because this book offers to you readable information. Do you at times have book but you do not get what it's exactly about. Oh come on, that will not happen if you have this within your hand. The Enjoyable arrangement here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss the idea? Find this book in addition to read it from today!

Andrea Behnke:

Don't be worry if you are afraid that this book can filled the space in your house, you may have it in e-book method, more simple and reachable. This specific Computer Vision in Robotics and Industrial Applications (Series in Computer Vision) can give you a lot of buddies because by you looking at this one book you have factor that they don't and make an individual more like an interesting person. This specific book can be one of one step for you to get success. This reserve offer you information that possibly your friend doesn't recognize, by knowing more than different make you to be great folks. So , why hesitate? Let us have Computer Vision in Robotics and Industrial Applications (Series in Computer Vision).
