Comparative Biochemistry of Parasites Van Den Bossche

Comparative Biochemistry of Parasites contains the proceedings of an international symposium organized by the Janssen Research Foundation and held at Janssen Pharmaceutica in Belgium on September 1-3, 1971.

The symposium reviewed progress in the understanding of the physiology and biochemistry of parasites such as protozoa and helminths.

Organized into 34 chapters, this volume begins with an overview of early research on parasite biochemistry before turning to a discussion of antischistosomal drugs and their biochemical effects on parasites. The reader is then introduced to the biochemistry of carbohydrates in nematodes and cestodes; neurotransmitters in trematodes; pharmacological aspects and biochemical effects of tetramisole; the mechanism of action of berenil (Diminazene) and related compounds; and dihydrofolate reductases in parasitic protozoa and helminths. Other chapters focus on the loss of fatty acid biosynthesis in flatworms, the cytochrome system in Kinetoplastidae, oxidative phosphorylation in *Moniezia* mitochondria, and the role of non-heme iron in cestode respiration.

Scientists, particularly physiologists and biochemists, will find this book an invaluable source of information on parasite physiology and biochemistry.

From reader reviews:

Joe Bell:

The feeling that you get from Comparative Biochemistry of Parasites may be the more deep you excavating the information that hide inside the words the more you get interested in reading it. It does not mean that this book is hard to know but Comparative Biochemistry of Parasites giving you buzz feeling of reading. The writer conveys their point in particular way that can be understood by simply anyone who read this because the author of this guide is well-known enough. That book also makes your current vocabulary increase well. It is therefore easy to understand then can go together with you, both in printed or e-book style are available. We advise you for having this Comparative Biochemistry of Parasites instantly.

Anthony Hanna:

Information is provisions for people to get better life, information currently can get by anyone from everywhere. The information can be a know-how or any news even a problem. What people must be consider if those information which is within the former life are challenging to be find than now is taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you obtain the unstable resource then you get it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Comparative Biochemistry of Parasites as the daily resource information.

Cedric Barnett:

The reserve with title Comparative Biochemistry of Parasites includes a lot of information that you can learn it. You can get a lot of help after read this book. This book exist new knowledge the information that exist in this e-book represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This specific book will bring you throughout new era of the syndication. You can read the e-book in your smart phone, so you can read it anywhere you want.

Lorraine Joyner:

As a university student exactly feel bored to reading. If their teacher inquired them to go to the library in order to make summary for some guide, they are complained. Just tiny students that has reading's soul or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Comparative Biochemistry of Parasites can make you really feel more interested to read.
