## **Social Media, Parties, and Political Inequalities** Kristof Jacobs, Niels Spierings

How has social media transformed politics in Western democracies? This book examines this question by focusing on the influence of unique qualities of social media on the power balance between and within parties. The authors presents a general theory as well as an in-depth comparative case study of the Netherlands. They revisit the debate on whether technological innovations affect the power balance in a political system, and show how their introduction leads to equalization for some and normalization for others. In addition to national politics, Jacobs and Spierings investigates often-overlooked topics such as local/European politics and the impact on women and ethnic-minorities.
