France, Britain and the United States in the Twentieth Century 1900 - 1940: A Reappraisal (Studies in Diplomacy and International Relations) Andrew Williams

Why is France so often neglected in the study of international relations? This book seeks to redress this balance, providing an in-depth insight into the relationship between the two Anglo-Saxon Powers, the United States (USA) and the United Kingdom (UK), and France from 1900 to the Fall of France in 1940.

Drawing on a range of sources and archival material, Williams links the evolution of this complex relationship to the parallel evolution of the study and practice of international relations and suggests that the Anglo-Saxon bias within international relations has obscured the vital contribution made by France to our thinking about the subject. The differing reaction in France, the UK and the USA over the wars in Afghanistan and Iraq shows just how contemporary a topic this is, and its continued relevance to global politics.
