Scientific Christian Mental Practice Emma Curtis Hopkins

American writer, educator, theologian, and feminist pioneer EMMA CURTIS HOPKINS (1849-1925) may well be the most important woman in the history of religion in the United States. Influenced by Mary Baker Eddy and her "Christian Science," Hopkins developed the more metaphysical philosophy of New Thought, an early "New Age" outlook that encouraged its adherents to tap the latent powers of their potent minds. Known as "the teacher of teachers," Hopkins inspired her students, many of whom went on to become influential leaders of the New Thought movement, to give full expression to their creative genius.

In this 1888 book, considered by many her masterpiece, Hopkins explores the wisdom of Jesus Christ from twelve different perspectives, all of which demonstrate, in their own unique ways, how we all hold within us the mystical energy to transform ourselves, our lives, and the world itself for the better, and to fill our hearts with the joy of the infinite.
