Geometry and Topology

Miles Reid, Balazs Szendroi

Geometry and Topology Miles Reid, Balazs Szendroi

Geometry provides a whole range of views on the universe, serving as the inspiration, technical toolkit and ultimate goal for many branches of mathematics and physics. This book introduces the ideas of geometry, and includes a generous supply of simple explanations and examples. The treatment emphasises coordinate systems and the coordinate changes that generate symmetries. The discussion moves from Euclidean to non-Euclidean geometries, including spherical and hyperbolic geometry, and then on to affine and projective linear geometries. Group theory is introduced to treat geometric symmetries, leading to the unification of geometry and group theory in the Erlangen program. An introduction to basic topology follows, with the Möbius strip, the Klein bottle and the surface with g handles exemplifying quotient topologies and the homeomorphism problem. Topology combines with group theory to yield the geometry of transformation groups,having applications to relativity theory and quantum mechanics. A final chapter features historical discussions and indications for further reading. With minimal prerequisites, the book provides a first glimpse of many research topics in modern algebra, geometry and theoretical physics. The book is based on many years' teaching experience, and is thoroughly class-tested. There are copious illustrations, and each chapter ends with a wide supply of exercises. Further teaching material is available for teachers via the web, including assignable problem sheets with solutions.

From reader reviews:

Johnnie Santiago:

Why don't make it to become your habit? Right now, try to ready your time to do the important act, like looking for your favorite book and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Geometry and Topology. Try to make the book Geometry and Topology as your close friend. It means that it can for being your friend when you truly feel alone and beside associated with course make you smarter than previously. Yeah, it is very fortuned for yourself. The book makes you a lot more confidence because you can know every thing by the book. So , let's make new experience and knowledge with this book.

Betty Norsworthy:

As people who live in typically the modest era should be revise about what going on or facts even knowledge to make them keep up with the era which is always change and advance. Some of you maybe will certainly update themselves by looking at books. It is a good choice for you personally but the problems coming to you is you don't know which one you should start with. This Geometry and Topology is our recommendation so you keep up with the world. Why, as this book serves what you want and need in this era.

Edgar Hightower:

In this era globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The particular book that recommended to your account is Geometry and Topology this e-book consist a lot of the information with the condition of this world now. That book was represented how do the world has grown up. The language styles that writer value to explain it is easy to understand. The actual writer made some investigation when he makes this book. That's why this book acceptable all of you.

Sanjuana Day:

With this era which is the greater man or who has ability in doing something more are more treasured than other. Do you want to become considered one of it? It is just simple way to have that. What you have to do is just spending your time very little but quite enough to possess a look at some books. On the list of books in the top listing in your reading list is definitely Geometry and Topology. This book which is qualified as The Hungry Mountains can get you closer in getting precious person. By looking upwards and review this reserve you can get many advantages.
