Product and Process Modelling: A Case Study Approach

Ian T. Cameron, Rafiqul Gani

Product and Process Modelling: A Case Study Approach Ian T. Cameron, Rafiqul Gani

This book covers the area of product and process modelling via a case study approach. It addresses a wide range of modelling applications with emphasis on modelling methodology and the subsequent in-depth analysis of mathematical models to gain insight via structural aspects of the models. These approaches are put into the context of life cycle modelling, where multiscale and multiform modelling is increasingly prevalent in the 21st century. The book commences with a discussion of modern product and process modelling theory and practice followed by a series of case studies drawn from a variety of process industries. The book builds on the extensive modelling experience of the authors, who have developed models for both research and industrial purposes. It complements existing books by the authors in the modelling area. Those areas include the traditional petroleum and petrochemical industries to biotechnology applications, food, polymer and human health application areas. The book highlights the important nature of modern product and process modelling in the decision making processes across the life cycle. As such it provides an important resource for students, researchers and industrial practitioners.

Ian Cameron is Professor in Chemical Engineering at the University of Queensland with teaching, research, and consulting activities in process systems engineering. He has a particular interest in process modelling, dynamic simulation, and the application of functional systems perspectives to risk management, having extensive industrial experience in these areas. He continues to work closely with industry and government on systems approaches to process and risk management issues. He received his BE from the University of New South Wales (Australia) and his PhD from Imperial College London. He is a Fellow of IChemE.

Rafiqul Gani is a Professor of Systems Design at the Department of Chemical and Biochemical Engineering, Technical University of Denmark, and the director of the Computer Aided Product-Process Engineering Center (CAPEC). His research interests include the development of computer-aided methods and tools for modelling, property estimation and process-product synthesis and design. He received his BSc from Bangladesh University of Engineering and Technology in 1975, and his MSc in 1976 and PhD in 1980 from Imperial College London. He is the editor-in-chief of Computers and Chemical Engineering journal and Fellow of IChemE as well as AIChE.

- product and process modelling; a wide range of case studies are covered
- structural analysis of model systems; insights into structure and solvability
- analysis of future developments; potential directions and significant research and development problems to be addressed

From reader reviews:

Thomas Garcia:

The book Product and Process Modelling: A Case Study Approach can give more knowledge and also the precise product information about everything you want. Why then must we leave the great thing like a book Product and Process Modelling: A Case Study Approach? Several of you have a different opinion about reserve. But one aim in which book can give many data for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or data that you take for that, you may give for each other; it is possible to share all of these. Book Product and Process Modelling: A Case Study Approach has simple shape however, you know: it has great and big function for you. You can look the enormous world by available and read a reserve. So it is very wonderful.

Cindy Johnson:

Reading a book for being new life style in this yr; every people loves to learn a book. When you read a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what sorts of book that you have read. If you want to get information about your analysis, you can read education books, but if you act like you want to entertain yourself read a fiction books, this sort of us novel, comics, and also soon. The Product and Process Modelling: A Case Study Approach provide you with a new experience in studying a book.

James Fulk:

Many people spending their moment by playing outside together with friends, fun activity together with family or just watching TV the entire day. You can have new activity to enjoy your whole day by examining a book. Ugh, you think reading a book can actually hard because you have to accept the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Mobile phone. Like Product and Process Modelling: A Case Study Approach which is keeping the e-book version. So , why not try out this book? Let's view.

Marcia Marshall:

In this era which is the greater particular person or who has ability to do something more are more important than other. Do you want to become considered one of it? It is just simple way to have that. What you have to do is just spending your time almost no but quite enough to enjoy a look at some books. One of several books in the top list in your reading list will be Product and Process Modelling: A Case Study Approach. This book which is qualified as The Hungry Hillside can get you closer in turning out to be precious person. By looking right up and review this e-book you can get many advantages.
