- Provides both practical and theological perspectives on using media appropriately and pastorally

Rapid cultural and technological changes through the last two decades have changed the context for ministry. The development of digital social media and advances in affordable, mobile technologies have dramatically changed the way most people interact with others, communicate, organize, and participate in communities.

The Digital Cathedral is a warm embrace of the rich traditions of Christianity, especially the recovery of the premodern sense of cathedral, which encompassed the depth and breadth of daily life within the physical and imaginative landscape of the church. It is for anyone who seeks to effectively minister in a digitally integrated world, and who wishes to embody the networked, relational, and incarnational characteristics of that ministry.
