## **Secrets of the Mind: A Tale of Discovery and Mistaken Identity** A.G. Cairns-Smith

Written in a provocative, witty, and highly accessible style, this is not only a splendid general introduction to the central questions of consciousness and brain science, but also an answer to some of them. The author -- noted Glaswegian chemist A.G. Cairns-Smith -- believes our feelings and sensations are not simply alternative descriptions of neural events but have themselves evolved and have physical effects in the brain as well as physical causes. *Secrets of the Mind* portrays a vision of the world as it may come to be seen by a future science. Sand, sea water, air, and the atoms from which such materials are made are now well understood by science, but the same can not be said of our personal feelings, our sensations and emotions. Science tells us that these too must be forms of quantum energy if they evolved, yet is only now beginning to explain how.

#### **Katherine Velasquez:**

As a university student exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some publication, they are complained. Just minor students that has reading's soul or real their pastime. They just do what the educator want, like asked to go to the library. They go to there but nothing reading really. Any students feel that studying is not important, boring along with can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So, this Secrets of the Mind: A Tale of Discovery and Mistaken Identity can make you feel more interested to read.
