Smart-Wiring Your Baby's Brain: What You Can Do to Stimulate Your Child During the Critical First Three Years Winifred Conkling

Has science shoved parents out of the nursery? Judging from the steady stream of headlines, one would think biologists have discovered a gene for every aspect of behavior. Now, Winifred Conkling reassures us that there's still room to help our children reach their personal best. In clear, compassionate language, Conkling tells parents how to make practical use of the latest research on early brain development, offering invaluable advice on how to:

- Create a nurturing environment in which you child can grow cognitively
- Encourage movement and motor development
- Stimulate speech and language development
- Foster a child's emotional health and personal identity
- Make toy and food choices appropriate to each stage of development

With specific, sound advice; readable charts and timetables; and clear, easy-to-understand language, Winifred Conkling translates the latest scientific discoveries into useful ways to help your child live up to his or her fullest potential.
