## **Data Processing** T F Fry

Data Processing discusses the principles, practices, and associated tools in data processing. The book is comprised of 17 chapters that are organized into three parts.

The first part covers the characteristics, systems, and methods of data processing. Part 2 deals with the data processing practice; this part discusses the data input, output, and storage. The last part discusses topics related to systems and software in data processing, which include checks and controls, computer language and programs, and program elements and structures.

The text will be useful to practitioners of computer-related fields who wish to have a better comprehension of the inner workings of data processing.
