Applied Muscle Biology and Meat Science

Applied Muscle Biology and Meat Science

Many of the difficulties that meat and animal scientists face when attempting to address specific problems—such as stress susceptibility and poor meat quality in swine—stem from a lack of understanding of the underlying biological mechanisms that drive muscle growth, metabolism, and its conversion to meat. This book provides current knowledge about skeletal muscle and meat, and serves as a platform for further investigation of specific technical issues.

Applied Muscle Biology and Meat Science outlines the tremendous strides made in the field of muscle biology in recent years, particularly pertaining to the understanding of the mechanisms that control skeletal muscle growth and development. With a distinguished international team of contributors, this text discusses the impact these factors have on meat production and quality with worldwide applicability.

This state-of-the-science reference covers a wide range of topics in muscle biology and meat science, including genetic selection, muscle structure and development, muscle protein turnover and meat tenderization, meat quality, collagen, color, lipid, and meat safety. With approximately 85 illustrations and tables, the text focuses on biological changes and the appropriate management techniques for meat animals.

Given recent developments in energy costs and distribution and changes in the commodities markets driven by the demand for biofuels, the challenges for animal production agriculture will only increase. This valuable text furthers understanding of the underlying biological mechanisms that are related to animal and meat production--an understanding that will play an integral role in solving today's industry challenges.

From reader reviews:

David Russell:

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite guide and reading a book. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Applied Muscle Biology and Meat Science. Try to make the book Applied Muscle Biology and Meat Science as your good friend. It means that it can being your friend when you experience alone and beside associated with course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know every thing by the book. So , we need to make new experience and also knowledge with this book.

Mark Clark:

Do you among people who can't read pleasurable if the sentence chained within the straightway, hold on guys this particular aren't like that. This Applied Muscle Biology and Meat Science book is readable simply by you who hate the straight word style. You will find the info here are arrange for enjoyable reading experience without leaving possibly decrease the knowledge that want to deliver to you. The writer of Applied Muscle Biology and Meat Science content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the articles but it just different in the form of it. So , do you continue to thinking Applied Muscle Biology and Meat Science is not loveable to be your top checklist reading book?

Sherrill Height:

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them household or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, or maybe playing video games all day long. If you need to try to find a new activity that is look different you can read the book. It is really fun for you personally. If you enjoy the book that you just read you can spent all day long to reading a reserve. The book Applied Muscle Biology and Meat Science it is very good to read. There are a lot of those who recommended this book. They were enjoying reading this book. In case you did not have enough space to deliver this book you can buy typically the e-book. You can m0ore simply to read this book from the smart phone. The price is not very costly but this book offers high quality.

Betty Norsworthy:

Playing with family within a park, coming to see the sea world or hanging out with pals is thing that usually you may have done when you have spare time, in that case why you don't try thing that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Applied Muscle Biology and Meat Science, you are able to enjoy both. It is good combination right, you still desire to miss it? What kind of hang type is it? Oh seriously its mind hangout guys. What? Still don't obtain it, oh come on its named reading friends.
