Biofuels from Algae: Chapter 5. Algal Biomass Harvesting Kuan-Yeow Show, Duu-Jong Lee

Extensive effort is being made globally to develop various biofuels as an inexhaustible and renewable energy source. Biofuels are viewed as promising alternatives to conventional fossil fuels because they have the potential to eliminate major environmental problems such as global warming and climate change created by fossil fuels. Among the still-developing biofuel technologies, biodiesel production from algae offers a good prospect for large-scale practical use, considering the fact that algae are capable of producing much more yield than other biofuels such as corn and soybean crops. Although research on algae-based biofuel is still in its developing stage, extensive work on laboratory- and pilot-scale algae-harvesting systems with promising prospects has been reported. This chapter presents a discussion of the literature review of recent advances in algal biomass harvesting. The chapter focuses on stability and separability of algae and algae-harvesting methods. Challenges and prospects of algae harvesting are also outlined. The review aims to provide useful information for future development of efficient and commercially viable algal biodiesel production.

From reader reviews:

Merry Springs:

Reading a guide tends to be new life style on this era globalization. With reading through you can get a lot of information that could give you benefit in your life. Along with book everyone in this world may share their idea. Publications can also inspire a lot of people. A great deal of author can inspire their own reader with their story or even their experience. Not only the storyline that share in the textbooks. But also they write about the information about something that you need instance. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors these days always try to improve their ability in writing, they also doing some investigation before they write to the book. One of them is this Biofuels from Algae: Chapter 5. Algal Biomass Harvesting.

Doreen Williams:

The publication with title Biofuels from Algae: Chapter 5. Algal Biomass Harvesting has lot of information that you can learn it. You can get a lot of advantage after read this book. This specific book exist new understanding the information that exist in this e-book represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This kind of book will bring you within new era of the syndication. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

Gina Keller:

The book untitled Biofuels from Algae: Chapter 5. Algal Biomass Harvesting contain a lot of information on that. The writer explains your girlfriend idea with easy means. The language is very clear to see all the people, so do not necessarily worry, you can easy to read this. The book was authored by famous author. The author will bring you in the new age of literary works. You can read this book because you can please read on your smart phone, or program, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site as well as order it. Have a nice go through.

Courtney Osteen:

As we know that book is very important thing to add our know-how for everything. By a guide we can know everything you want. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This reserve Biofuels from Algae: Chapter 5. Algal Biomass Harvesting was filled concerning science. Spend your free time to add your knowledge about your science competence. Some people has diverse feel when they reading any book. If you know how big advantage of a book, you can sense enjoy to read a reserve. In the modern era like right now, many ways to get book which you wanted.
