## **Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks** Harry G. Perros

A thorough knowledge of modern connection-oriented networks is essential to understanding the current and near-future state of networking.

This book provides a complete overview of connection-oriented networks, discussing both packet-switched and circuit-switched networks, which, though seemingly different, share common networking principles. It details the history and development of such networks, and defines their terminology and architecture, before progressing to aspects such as signaling and standards. There is inclusive coverage of SONET/SDH, ATM networks, Multi-Protocol Label Switching (MPLS), optical networks, access networks and voice over ATM and MPLS.

Connection-oriented Networks:

- \* Provides in-depth, systematic coverage of several connection-oriented networks in a single volume
- \* Explains topics such as the Generic Framing Procedure, Label Distribution Protocols, Wavelength Routing Optical Networks, Optical Burst Switching, and Access Networks in detail
- \* Illustrates all concepts with problems and simulation projects to test and deepen your understanding
- \* Includes an accompanying website with solutions manual and complete set of PowerPoint presentations for each chapter

Senior undergraduate and graduate students in telecommunication and networking courses, as well as networking engineers, will find this comprehensive guide to connection-oriented packet-switched and circuit-switched networks useful for their training. The book presents tried and tested material based on an existing, successful course.

### **From reader reviews:**

#### **Sheila Rocha:**

With other case, little people like to read book Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks. You can choose the best book if you appreciate reading a book. Providing we know about how is important any book Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks. You can add information and of course you can around the world with a book. Absolutely right, since from book you can understand everything! From your country right up until foreign or abroad you may be known. About simple issue until wonderful thing you are able to know that. In this era, we can open a book as well as searching by internet gadget. It is called e-book. You can utilize it when you feel fed up to go to the library. Let's examine.

#### **Eugene Glover:**

Nowadays reading books be a little more than want or need but also get a life style. This reading behavior give you lot of advantages. The benefits you got of course the knowledge your information inside the book this improve your knowledge and information. The data you get based on what kind of reserve you read, if you want drive more knowledge just go with education and learning books but if you want truly feel happy read one using theme for entertaining including comic or novel. The Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks is kind of e-book which is giving the reader unforeseen experience.

#### **Patricia Welling:**

Reading can called head hangout, why? Because if you find yourself reading a book mainly book entitled Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks the mind will drift away trough every dimension, wandering in most aspect that maybe unidentified for but surely will end up your mind friends. Imaging every single word written in a e-book then become one type conclusion and explanation in which maybe you never get ahead of. The Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks giving you an additional experience more than blown away your brain but also giving you useful data for your better life within this era. So now let us teach you the relaxing pattern is your body and mind is going to be pleased when you are finished reading through it, like winning an activity. Do you want to try this extraordinary investing spare time activity?

#### **Betty Johnston:**

Reading a book to be new life style in this 12 months; every people loves to read a book. When you study a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you need to get information about your study, you can read education books, but if you want to entertain yourself you can read a fiction books, these us novel, comics, in addition to soon. The

Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks will give you a new experience in looking at a book.
