Memory Mechanisms: A Tribute To G.v. Goddard Michael Corballis, K. Geoffrey White

Presenting the work of researchers who are at the forefront of the study of memory mechanisms, this volume addresses a wide range of topics including: physiological and biophysical studies of synaptic plasticity, neural models of information storage and recall, functional and structural considerations of amnesia in brain-damaged patients, and behavioral studies of animal cognition and memory. The book's coverage of diverse approaches to memory mechanisms is intended to help dissolve the borders between behavioral psychology, cognitive neuropsychology, and neurophysiology.
