A First Course in Differential Equations (Undergraduate Texts in Mathematics)

J. David Logan

A First Course in Differential Equations (Undergraduate Texts in Mathematics)

J. David Logan

A First Course in Differential Equations (Undergraduate Texts in Mathematics) J. David Logan
This book is intended as an alternative to the standard differential equations text, which typically includes a large collection of methods and applications, packaged with state-of-the-art color graphics, student solution manuals, the latest fonts, marginal notes, and web-based supplements. These texts adds up to several hundred pages of text and can be very expensive for students to buy. Many students do not have the time or desire to read voluminous texts and explore internet supplements. Here, however, the author writes concisely, to the point, and in plain language. Many examples and exercises are included. In addition, this text also encourages students to use a computer algebra system to solve problems numerically, and as such, templates of MATLAB programs that solve differential equations are given in an appendix, as well as basic Maple and Mathematica commands.

From reader reviews:

Irene Justice:

The book A First Course in Differential Equations (Undergraduate Texts in Mathematics) make you feel enjoy for your spare time. You can utilize to make your capable much more increase. Book can to get your best friend when you getting strain or having big problem together with your subject. If you can make examining a book A First Course in Differential Equations (Undergraduate Texts in Mathematics) for being your habit, you can get much more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You can know everything if you like wide open and read a publication A First Course in Differential Equations (Undergraduate Texts in Mathematics). Kinds of book are a lot of. It means that, science e-book or encyclopedia or some others. So , how do you think about this publication?

Elbert Gibson:

Are you kind of busy person, only have 10 or maybe 15 minute in your moment to upgrading your mind talent or thinking skill actually analytical thinking? Then you have problem with the book compared to can satisfy your short time to read it because this time you only find e-book that need more time to be read. A First Course in Differential Equations (Undergraduate Texts in Mathematics) can be your answer given it can be read by an individual who have those short free time problems.

Lynn Gallagher:

This A First Course in Differential Equations (Undergraduate Texts in Mathematics) is new way for you who has attention to look for some information mainly because it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know otherwise you who still having tiny amount of digest in reading this A First Course in Differential Equations (Undergraduate Texts in Mathematics) can be the light food to suit your needs because the information inside that book is easy to get simply by anyone. These books create itself in the form which is reachable by anyone, that's why I mean in the e-book web form. People who think that in book form make them feel drowsy even dizzy this publication is the answer. So there isn't any in reading a reserve especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss the item! Just read this e-book style for your better life in addition to knowledge.

Bernard Taylor:

Don't be worry when you are afraid that this book will certainly filled the space in your house, you might have it in e-book approach, more simple and reachable. That A First Course in Differential Equations (Undergraduate Texts in Mathematics) can give you a lot of close friends because by you investigating this one book you have point that they don't and make anyone more like an interesting person. This book can be one of a step for you to get success. This publication offer you information that probably your friend doesn't

know, by knowing more than some other make you to be great individuals. So , why hesitate? We need to have A First Course in Differential Equations (Undergraduate Texts in Mathematics).
