Nonlinear Model-Based Image/Video Processing and Analysis

Nonlinear Model-Based Image/Video Processing and Analysis

A comprehensive survey of techniques and applications in image and video processing and analysis

A widely varied selection of experts provides extensive coverage of nonlinear model-based techniques in image and video processing and analysis. This volume not only details new techniques in still image and digital video but also discusses applications in computer vision, multimedia, and visual information retrieval systems. All nonlinear, model-based techniques are detailed, and a complete and up-to-date accounting of the most important and effective algorithms is included for every application and technique discussed.

The applications described also include such real-world uses as multimedia information retrieval, automatic surveillance, lip tracking, and much more. Analytical techniques such as Boolean and stack filters, rational functions, mathematical morphology techniques, and adaptive order statistic filtering receive detailed treatment as they apply to specific uses such as image compression, segmentation, old motion picture restoration, image/video interpolation, and noise smoothing.

Chapters include:

- * Optimal Design of Boolean and Stack Filters and Their Application in Image Processing
- * Image Processing Using Rational Functions
- * Mathematical Morphology and Motion Picture Restoration
- * Adaptive Order Statistic Filtering of Still Images and Image Sequences
- * Video Segmentation Based on Multiple Features for Interactive and Automatic Multimedia Applications
- * Invariant Features in Pattern Recognition-Fundamentals and Applications
- * Image Models for Facial Feature Tracking

Students, engineers, and scientists will appreciate both the wide range of expert opinion in this comprehensive volume and the detailed coverage of the algorithms and mathematical models used in state-of-the-art image and video processing.

From reader reviews:

Karena Figueroa:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to be aware of everything in the world. Each book has different aim as well as goal; it means that book has different type. Some people sense enjoy to spend their time for you to read a book. They are reading whatever they take because their hobby is reading a book. Consider the person who don't like reading through a book? Sometime, individual feel need book once they found difficult problem or maybe exercise. Well, probably you will need this Nonlinear Model-Based Image/Video Processing and Analysis.

Dorothy Alvarez:

Information is provisions for folks to get better life, information these days can get by anyone from everywhere. The information can be a information or any news even a concern. What people must be consider when those information which is inside the former life are hard to be find than now's taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you have the unstable resource then you buy it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take Nonlinear Model-Based Image/Video Processing and Analysis as the daily resource information.

Kathryn Hebert:

The book Nonlinear Model-Based Image/Video Processing and Analysis has a lot of information on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. The writer makes some research before write this book. That book very easy to read you can obtain the point easily after reading this book.

James Harris:

You can get this Nonlinear Model-Based Image/Video Processing and Analysis by look at the bookstore or Mall. Just viewing or reviewing it might to be your solve issue if you get difficulties to your knowledge. Kinds of this book are various. Not only by simply written or printed but in addition can you enjoy this book by simply e-book. In the modern era similar to now, you just looking by your local mobile phone and searching what their problem. Right now, choose your ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still update. Let's try to choose proper ways for you.
