Nandasiri Jasentuliyana

This volume presents an analysis of the historical background, current status, and future development of space law by noted legal scholars. It focuses on a distinct and growing field of international law that incorporates both public and private law. Specific areas covered are scientific and technical aspects of space and space law; the United Nations and other institutional arrangements; national regulatory aspects; satellite applications; commercialization; dispute settlement; and case law.

Since the establishment of a special law-making body at the United Nations in 1958, there has been a steady expansion of laws and regulations pertaining to space activities. The result has been the development of a distinct and mature discipline of international law. This analysis of space law by recognized experts in the field will interest scholars, practitioners, and policy-makers involved in the regulation of space use and exploration.
