# Valuation: Methods and Models in Applied Corporate Finance

George Chacko, Carolyn L. Evans

**Valuation: Methods and Models in Applied Corporate Finance** George Chacko, Carolyn L. Evans  
Master corporate valuation: the financial art and science of accurately valuing any business. George Chacko's *Applied Corporate Finance: Valuation* is the first valuation book to combine true academic rigor with the practical skills you need to successfully value companies in the real world. Renowned financial instructor and investment manager George Chacko focuses on concepts, techniques, tools, and methodologies that lead directly to accurate valuations, and explains each key concept with up-to-date examples. One step at a time, Chacko develops a practical, rigorous approach to conducting valuation, addressing the projection of financial statements, calculation of free cash flows, risk-adjusted cost of capital, and leading methodologies including WACC, flow-to-equity, and Adjusted Present Value (APV). By avoiding elementary content that financial managers, analysts, and MBA-level finance students already know, this book can focus more tightly on the realistic techniques and advanced issues practitioners are actually concerned with. Coverage includes: market value and accounting balance sheets, cash cycles, the DuPont formula, financial distress, and capital as a risk buffer; constructing pro-formas, projecting and bridging financing shortfalls, and planning sustainable growth; sources/uses of cash, cash income statements, pro-forma balance sheet changes, working capital, depreciation, and capital expenditures; risk-free cost, investment risks, and diversifiable vs. idiosyncratic risks; NPV, APV, Optimal Debt Ratios, Capital Structure Dynamics, Terminal Value Calculations, and more. *For all finance professionals, analysts, and MBA students who need to sharpen their skills in valuation and related areas of corporate finance, accounting, or strategic planning.*
