## Public Budgeting in African Nations: Fiscal Analysis in Development Management

*Public Budgeting in African Nations* aims to provide usable budgeting and fiscal policy management information to development practitioners interested in improving the performance of governments in the context of good governance. It shares regional and cross-cultural experiences with international audiences and gives reflective attention to comparative budgeting and fiscal policy management. With a promising economic and fiscal forecast, such information is timely for international development practitioners and for scholars and researchers interested in advancing development management.

This book adopts an interdisciplinary/pragmatic approach to analyze and present research findings on public budgeting as a sustainable development tool. The central argument is that development practice will benefit from a bottom-up, decentralized approach to budgeting and fiscal policy management, involving national, sub-national, and civil society institutions. From this perspective, a balanced budget should draw from and reflect values and priorities across the full spectrum of social and political life.
